

Perry Becker Design

Firm Overview

Perry Becker Design is an Orlando based Planning and Landscape Architectural firm that was started in 2011 by David Perry AICP, PLA and Keith Becker, PLA to provide planning, landscape architectural design and construction management services to both public and private sectors. During that time our firm has grown to include a full array of design disciplines including planners, landscape architects, thematic designers, graphic artists, 3D visualization animation artists, signage and wayfinding specialists, and construction managers.

Perry Becker Design is a boutique design firm by size, with an emphasis on maintaining direct Principal design engagement in every project. PBD has all of the services in-house to meet any project scope that may be assigned, but if necessary, we have a dedicated team of sub-consultants that we regularly team with including civil engineers, structural engineers, MEP's, geo-technical engineers, soil engineers, and many architects depending on the project needs.

PBD's principals have over 100 years of collective experience working both internationally and domestically, but with a strong emphasis on the Central Florida region. The Principals of Perry Becker Design have provided both planning and landscape architectural design services under master services contract and a sub-consultant to the following State Collegiate institutions:

- Edison State College
- Florida Atlantic University
- Palm Beach State College
- Seminole State College
- Sumpter State College
- Valencia State College
- Florida Southern College
- Santa Fe State College
- University of Florida
- University of Central Florida
- University of North Florida
- University of South Florida

We have provided a wide range of services ranging from master planning and streetscape design to site specific building area development design to full campus master signage programs. When engaged for construction design services, PBD regularly has provided full construction administration services to help ensure the final quality of the built project. We are well versed in construction costing and regularly provide cost estimation services for our projects as well.

Services

Landscape Architecture, Planning and Urban Design

- Campus Design & Master Planning
- Comprehensive Planning
- Corridor Redevelopment Planning
- Development Design Guidelines
- Development Feasibility Analysis

- Thematic Signage and Branding Design

Construction Services

- ADA Analysis and Construction Remediation
- Construction Administration
- Cost Estimation and Scheduling
- Landscape Contract Grow Management
- Plans Processing and Permitting
- Post Construction Analysis
- Project Management

Institutional Planning & Design

The practice of Institutional Design spans many markets ranging from Campus Master Planning to site specific area development design, but in every case the focus is on creating both functional and aesthetic environments for people to live, work, heal, learn and recreate. These environments are truly an expression of the symbiotic relationships between the physical building architecture and the land area in which they reside. Perry Becker Design has made this an area of specialized practice because it allows us to assist in shaping both the physical and social environments for people for the betterment of the communities in which we work. The following is just a brief overview of our institutional design experience:

Higher Education Planning and Design

University of Central Florida

- Academic Villages – Phase I&II
- Alumni Center
- Baseball & Softball Complex
- Biology Buildings I&II
- CREOL Building
